

CONNECT TO THE CLOUD FROM YOUR DEVICE

SECURELY SCAN TO AND PRINT FROM THE CLOUD WITH CLOUD DIRECT

Requiring access to documents wherever and whenever is now the norm. With many organisations choosing Cloud storage as their primary storage method, employers are now looking for the easiest way for their employees to access the Cloud and their saved documents.

Cloud Direct not only provides a straight connection to Cloud storage provider, Google Drive™, but also provides access to internet faxing from KYOCERA HyPAS™ enabled devices. Meaning users can scan into their Cloud storage, browse and retrieve documents and scan to internet fax from one place. All without the need for a PC.

BUSINESS CHALLENGES

- > When visiting satellite offices, I tend to save the documents I require to the Cloud – **can I retrieve them easily without my PC?**
- > When digitising my documents, I first scan them into my PC and then upload them to the Cloud – **isn't there a faster way?**
- > Data security and user authentication is crucial to my business – **are Cloud services really secure?**

YOUR ADVANTAGES WITH CLOUD DIRECT

- > **Print without a computer:** you can easily access and print your documents stored in Google Drive™ from any KYOCERA HyPAS™ enabled device.
- > **Take the shortcut:** Cloud Direct enables you to scan documents directly into your Cloud account, without using a PC.
- > **Data security and user authentication:** tie your Cloud storage log-in with user authentication such as PaperCut and the security of your data is ensured along with providing single sign-on.

KYOCERA HYPAS™ - TAILOR YOUR DEVICE TO SUIT YOUR BUSINESS

HyPAS™

HyPAS™ is KYOCERA's platform to develop custom business applications. These can run embedded inside the device and extend the device's functionality according to each user's needs. For powerful functionality, applications can connect to external server applications and integrate the HyPAS™ enabled device perfectly into the company's workflows. With HyPAS™, we can meet individual customer requirements and provide the right solution for your business.

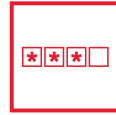

FEATURES & SPECIFICATIONS

KYOCERA Cloud Direct is your Cloud storage and internet fax hub, providing a bridge between your KYOCERA device and your documents stored in Google Drive™. Allowing users to scan to and print from their Google Drive™ account.

Cloud Direct also provides a connection to internet fax providers, meaning users can scan a document and send via internet fax to a recipient.

Scan to Cloud – upload scanned documents directly to your Google Drive™ Cloud account.

Single sign-on – integrate existing user authentication with Cloud Direct to provide single sign-on and seamlessly access documents in the Cloud

Print from cloud – access your documents directly from the panel of your HyPAS™ enabled device.

No PC required – easy installation and usage without the need for a separate server.

Scan to fax – scan documents to fax via internet fax.

Quick search – show all documents or use the search function directly from the HyPAS™ enabled panel.

Supported languages – the application can be set up in English, Spanish, French, Italian, German or Japanese.

File formats – JPEG, PDF and TIFF are supported for printing and scanning.

PRINT ANYWHERE & EVERYWHERE

Mobile devices, such as smartphones and tablet computers, have changed the way we work and constantly give rise to new business challenges. Business life has become a fast-paced world, where documents are increasingly stored or even shared in a Cloud. KYOCERA can support all your needs involving mobile and Cloud services, whether it is printing from a mobile device or from the Cloud, as well as ensuring the security of mobile solutions.

SUPPORTED SYSTEMS

Compatible with all HyPAS™-enabled MFPs
All TASKalfa i devices
Compatible with all HyPAS™-capable MFPs

Note that HyPAS™-enabled devices require a compatible external memory card.
